

Choice of viewing position
The two working drawings on this page and on page 47 opposite show different views of the same component. The drawing on page 47 shows an end view on the *right* of the front view. That on this page shows an end view on the *left* of the front view. Both are quite correct.

Rules for First Angle projection

Note: The following details shown in the two working drawings should be noted —

- 1 In First Angle projection, the PLAN is *below* the FRONT VIEW.
- 2 In First Angle projection the END VIEW on the *right* of the FRONT VIEW is the view as
