STATISTICAL DIGEST

6TH EDITION

FOREWORD

Record keeping, no doubt, is an essential tool for planning and administration of resources. Effective organisations and systems rest on the foundation of available, accurate and reliable data. These they utilise to turn around the system and even predict the future. No wonder renowned educationists, Shetzer and Stone quipped "Careful examination of the past illuminates the present and suggests the pattern of the future. That which is now was changed by the experiences of a then that extends back in an unbroken sequence". A comprehensive data collection as vital indices for immediate and future progress of the Federal University of Agriculture, Abeokuta cannot be over emphasised. This has underscored the need for the annual publication of this Statistical Digest of the University, since 2007.

This 6th edition of the FUNAAB Statistical Digest is the latest update of the University Statistics. It would be very useful and of particular interest to all stakeholders of the University, especially, students, staff, parents, researchers in education, educational administrators, policy makers, government and non-governmental organisations and international agencies.

The Academic and Non-Teaching Units that provided raw data for this publication are appreciated. I also commend the dedication and commitment of the Academic Planning Unit for the production of this Statistical Digest in the last six years.

Professor Olusola Bandele Oyewole
Vice-Chancellor
Federal University of Agriculture,
Abeokuta,
Ogun State.

STATISTICAL DIGEST 6TH EDITION

OVERVIEW

No good planning can take place in any organisation without having accurate and reliable data. Data refer to factual information, or facts from reliable figures obtained from observations, experiments or surveys used as basis for analysis to draw conclusions for decision making. Conscious efforts must therefore be made to preserve them.

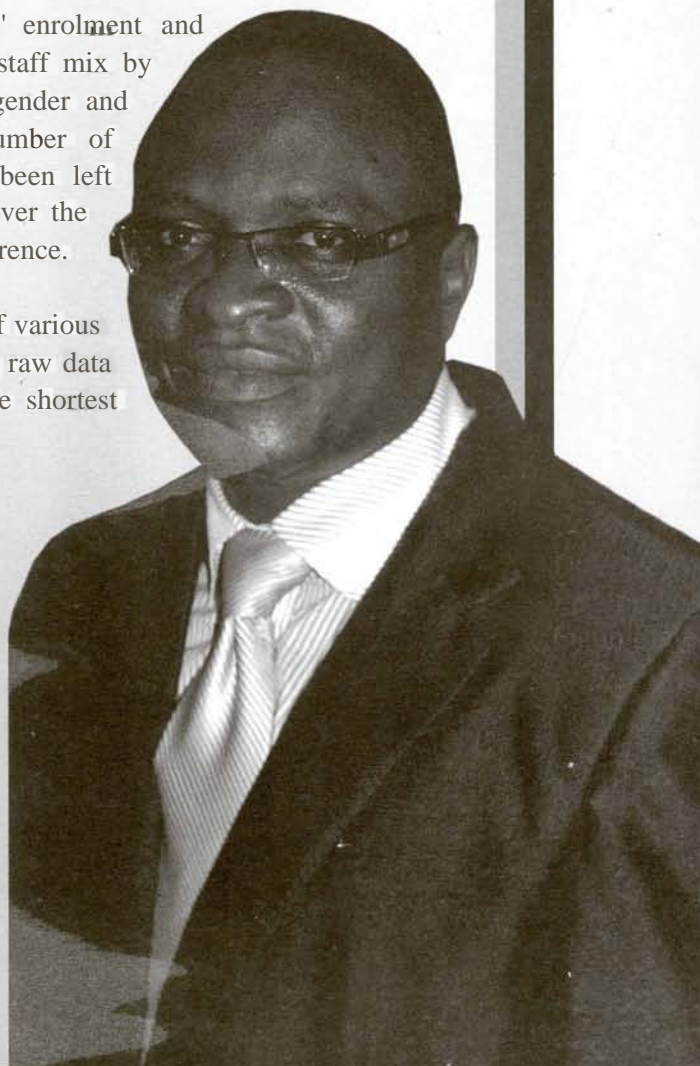

The Federal University of Agriculture, Abeokuta (FUNAAB) just witnessed a change in the mantle of its leadership with the emergence of Professor Olusola Bandele Oyewole as the new Vice-Chancellor. This is a man with the vision of taking the University to a world class status. To achieve this, there is need to establish a good data base through constant review and update of University basic statistics. This edition of the Statistical Digest presents as usual, a five (5) year data (2007/2008 to 2011/2012) on the performance index of various units of the University such as students, staff, health, financial statistics, University library resources and physical facilities, as well as inaugural lectures from inception in 1994 to 2012.

Newly generated data in this edition included students' enrolment and number of academic staff by department; academic staff mix by department; academic staff by department, rank and gender and FUNAAB graduation profile for 2011/2012. The number of departmental courses in the University has also not been left out. Thus, the publication is a further improvement over the previous ones. The data are well laid out for ease of reference.

The Academic Planning Unit appreciates the efforts of various Colleges, Departments, Centres and Units in providing raw data which were processed for this publication even at the shortest notice.

Professor M.A. Waheed

Director, Academic Planning Unit
Federal University of Agriculture, Abeokuta,
Ogun State.

STATISTICAL DIGEST 6TH EDITION

INTRODUCTION

This is the sixth edition of FUNAAB Statistical Digest. It is a build up on the fifth edition. As in the previous editions, it presents statistical information on the University for a stretch of five years (2007/2008 to 2011/2012).

This edition has seven sections. Section one presents Institutional Information, Section two Information on Students' Statistics and Section three presents Staff Statistics. Sections two and three attempt to give more details on staff and students' profile, as innovations to previous editions. Sections four, five and six showcase information on the University Library Resources, University Health Statistics and Financial Statistics respectively, while section Seven deals with the Statistics on Physical Facilities.

The information therein will be very useful to researchers and all stakeholders in the field of education. Specifically, this edition will be of immense value to students, staff, parents, administrators and relevant agencies. No doubt you will pleasantly enjoy it.
