

### **Benefits:**

Organization benefits will include opportunity to showcase your products and enjoy global view and patronage, as well as participate in organization registration with the official website of EPSO allowing organizations to submit proposal and compete for research grants.

### **Exhibition:**

Full canopy space # 20,000.00  
Half canopy space # 10,000.00  
Quarter canopy space # 5,000.00

FASCINATION  
OF  
PLANTS DAY  
2019

Theme:

**Plants: Sustainable Environment,  
Health & Livelihood**

Date: Tuesday August 6, 2019

Venue: Ceremonial Building (East Wing),  
Federal University of Agriculture, Abeokuta, Nigeria

Time: 10.00 am prompt

## **Introduction**

The fifth international and third national "Fascination of Plants Day 2019" will be launched under the umbrella of the European Plant Science Organization (EPSO). The goal of this activity is to get as many people as possible around the world that are enthused about the importance of plant science for agriculture, in sustainably producing food, as well as for horticulture, forestry, and all of the non-food products such as paper, timber, chemicals, energy, and pharmaceuticals. The role of plants in environmental conservation will also be a key message.

## **Background**

Plants are unique organisms. They can produce carbohydrate (sugars) just from sunlight, carbon dioxide and water. This ability to directly synthesize their own food has enabled plants to successfully colonize, adapt to, and diversify within almost every niche on the planet and biologists estimate the total number of plant species to be about 250,000. These abilities make plants the primary producers of biomass providing animals and mankind with food, feed, paper, medicine, chemicals, energy and an enjoyable landscape.

Anyone who would like to contribute to the Fascination of Plants Day (FoPD) is welcome to join.

## **Scope**

The Fascination of Plants Day (FoPD) covers all plant related topics including basic plant science, agriculture, horticulture & gardening, forestry, pasture, plant breeding, plant protection, food & nutrition, environmental conservation, climate change mitigation, smart bio-products, biodiversity, sustainability, renewable resources, plant science education & art.
