

Profile of Dr. Oyegunle Emmanuel Oke

i. Brief Biography

Dr. Oke is an Animal Environmental Physiologist with a thorough background in Animal Science. He earned his **PhD** in **Animal Physiology** from the Federal University of Agriculture, Abeokuta 2012. Before this, he had an Agric. in Animal Physiology (70.68% - A grade) and a B. Agric. in Animal Production and Health with a Second Class Upper Division (4.27/5.00) from the same University in 2010 and 2006, respectively.

He has a vast research and teaching experience. He was awarded a DAAD Scholarship as a Visiting Scholar at the University of Venda, Thohoyandou, Limpopo, South Africa. Before this, he received a prestigious Postdoc Fellowship award at the World Bank Centre of Excellence in Poultry Sciences, University of Lomé, Lomé Togo. He has published in peer-reviewed journals (local and international) and participated in local and international conferences.

His research aims to present epigenetic and nutritional techniques that will increase livestock output under stressful environmental conditions in light of the recent worries over food security and the worldwide push toward the "One Health" concept. He is currently investigating how phytogenic feed additives and novel feeding strategies might benefit poultry farming in terms of nutrition and health.
